

REGION 4

ATLANTA, GA 30303

April 24, 2024

Ms. Jennifer Dodd
Director, Division of Water Resources
Tennessee Department of Environment and Conservation
312 Rosa L. Parks Avenue
Nashville, Tennessee 37243-15340

Subject: Approval of the State of Tennessee's 2024 303(d) List Submittal

Dear Ms. Dodd:

The U.S. Environmental Protection Agency, Region 4, has completed its review of the State of Tennessee's Final 2024 Clean Water Act section 303(d) List of water quality limited segments. The EPA has determined that each of the water quality limited segments still requiring total maximum daily loads, identified on the State's 303(d) List, meets the requirements of the Clean Water Act section 303(d) and its implementing regulations at 40 C.F.R. section 130.7. The EPA hereby approves Tennessee's decision to include each of the waters designated by the State in its 2024 303(d) List. Enclosed for your information is the accompanying decision document for this approval action.

If you have questions concerning this matter, please feel free to contact me at (404) 562-9248 or Ms. Viola Reynolds, Manager, Monitoring, Assessment, Listing and TMDL Section at (404) 562-8455.

Sincerely,

Kathlene Butler
Director
Water Division
