

TENNESSEE DEPARTMENT OF HEALTH
DIVISION OF LABORATORY SERVICES

September 16, 2021

Dear Environmental Services Clients and Partners,

We would like to take this opportunity to thank you for your continued business and support.

This is a notice that effective with your September 2021 invoice, the rates for water bacteriological testing will increase by 10%. The increase in fee per sample reflects an increase in operational costs of conducting the associated laboratory testing. The most recent fee increase was last implemented in January 2012.

The Division of Laboratory Services is pleased to serve you and we thank you for your understanding.

Sincerely,

Richard Steece, Ph.D.

Richard Steece, PhD D(ABMM)

Public Health Laboratory Director
Division of Laboratory Services
