

The Labor Market Report

Per Capita Income 1969 to 2011

**October
2013**

**Bill Haslam,
Governor**

TENNESSEE

Department of Labor and Workforce Development

According to the U.S. Bureau of Economic Analysis, the per capita personal income in the United States was \$43,169 in 2011, up from \$41,404 in 2010 and \$4,053 in 1969.

Per capita personal income is defined as the annual total personal income of residents divided by the residential population as of July 1. Personal income is derived by summing the net earnings, rental income, personal dividend/interest income, and transfer payments by place of residence. Personal income excludes federal income tax deductions and other personal taxes and is reported in current dollars. In simpler terms, it is the total income on the front page of your 1040 tax form. This data can be influenced by large growth (or decline) in population, natural disasters (i.e., flooding or hurricanes), commuting populations (those that work in other non-MSA counties), and state and local taxes.

There are 366 Metropolitan Statistical Areas (MSAs) in the U.S. The Bridgeport-Stamford-Norwalk, Connecticut MSA had the highest per capita income in 1969 (\$5,834) as well as 2011 (\$78,504). Conversely, the McAllen-Edinburg-Mission, Texas MSA had the lowest per capita income in 1969 (\$1,763) as well as 2011 (\$21,620).

The Nashville/Davidson County-Murfreesboro-Franklin MSA had the highest per capita income in the state in 1969 and 2011. The former was \$3,389 while the latter was \$42,129. The per capita income doubled in Nashville between 1980 and 1990. In 1969, Chattanooga, Tennessee-Georgia had the second highest per capita income but in 2011 Clarksville, Tennessee-Kentucky (\$39,666) had the second highest per capita income in Tennessee. Morristown had the lowest MSA per capita income in Tennessee in both 1969 and 2011. However, all Tennessee MSAs, with the exception of Cleveland, had a better ranking in 2011 than in 1969.

About the Data

Some interesting observations over time: In 1969, Las Vegas, Nevada had the 17th highest per capita income but in 2011 it was 200th. Detroit, Michigan went from 15th to 107th and Lake Havasu-Kingman, Arizona

went from 138th to 362nd, one of the lowest in the nation. Hinesville-Fort Stewart, Georgia went from the bottom third in 1969 to the seventh worst in 2011. In Alaska, Anchorage went from 1st (in 1970 and 1980) to 21st in 2011. Fairbanks went from 7th to 67th.

On the positive ledger, Midland, Texas went from 26th in 1969 to 2nd in 2011. Boulder, Colorado went from 67th to 13th while Nashville went from 194th to 76th. During the time period, Clarksville's MSA per capita income increased from the 292nd highest to the 117th highest.

The per capita income of Bridgeport-Stamford-Norwalk (ranked #1) was over \$13,000 greater than the per capita income of Midland (ranked #2) in 2011. The next largest difference was \$4,400 between Anchorage and Los Angeles-Long Beach.

Percent Growth

There was a large growth rate over 40 years (862.0 percent). In the U.S. the per capita income increased by 146.6 percent (14.6 per year) in the 1970s; 92.1 percent in the 1980s; 56.7 percent in the 1990s; and 23.7 percent in the 2000s. However, the Consumer Price Index increased by 461.8 percent in the last 42 years. The CPI grew by 113.1 percent in the 1970s; 57.1 percent in the 1980s; 32.7 percent in the 1990s; and 26.4 percent in the 2000s.

In Nashville, the per capita income increased by 60.9 percent (6.1 percent per year) in the 1970s; 103.9 percent in the 1980s; 70.2 percent in the 1990s; and 28.1 percent in the 2000s. In Memphis the per capita income increased by 168.7 percent (16.9 percent per year) in the 1970s; 96.3 percent in the 1980s; 63.3 percent in the 1990s; and 28.1 percent in the 2000s. The MSAs with the highest and lowest per capita income had similar growth rates. Nationally, the Bridgeport-Stamford-Norwalk MSA per capita income increased by 147.3 percent (14.7 percent per year) in the 1970s; 124.1 percent in the 1980s; 76.9 percent in the 1990s; and 27.4 percent in the 2000s. The McAllen-Edinburg-Mission MSA per capita income increased by 173.6 percent (17.4 percent per year) in the 1970s; 74.0 percent in the 1980s; 50.1 percent in the 1990s; and 52.9 percent in the 2000s.

For more information about the per capita personal income in the state, counties and metro areas, go to the Bureau of Economic Analysis Web site at www.bea.gov.

Per Capita Personal Income for Metro Areas Over Five Decades

NONFARM EMPLOYMENT & LABOR FORCE NARRATIVE

Total nonfarm employment increased by 32,700 jobs from October 2012 to October 2013. There were large increases in retail trade (up 10,000 jobs), which included increases of 2,000 jobs in motor vehicle/parts dealers, 1,600 jobs in clothing/clothing accessories stores, 1,400 jobs in gasoline stations, and 1,300 jobs in building material/garden supply stores; accommodation/food services (up 9,700 jobs), which included an increase of 8,100 jobs in food services/drinking places; and professional/business services (up 6,900 jobs), which included increases of 6,300 jobs in professional/scientific/technical services and 1,300 jobs in management of companies/enterprises. Other significant increases were in transportation equipment manufacturing (up 5,300 jobs); social assistance (up 3,800 jobs); ambulatory health care services (up 3,400 jobs); financial activities (up 3,400 jobs), which includes an increase of 2,200 jobs in finance/insurance; arts/entertainment/recreation (up 2,300 jobs); and state government educational services (up 1,300 jobs).

These increases were partially offset by declines in nursing/residential care facilities (down 3,200 jobs), local government educational services (down 2,400 jobs), transportation/warehousing (down 1,800 jobs), federal government (down 1,700 jobs), mining/logging/construction (down 1,500 jobs); and wholesale trade (down 1,400 jobs).

During October 2013 nonfarm employment increased by 7,700 jobs. A majority of this increase occurred in both local and state educational services. The former was up by 3,400 jobs while the latter increased by 1,700 jobs. There were other seasonal increases in professional/business services (up 3,300 jobs), which includes an increase of 2,400 jobs in administrative/support/waste management; educational services (up 1,800 jobs); ambulatory health care services (up 1,400 jobs); and accommodation/food services (up 1,100 jobs). This was partially offset by declines of 3,100 jobs in arts/entertainment/recreation and 1,000 jobs in social assistance.

Tennessee's seasonally adjusted estimated unemployment rate for October 2013 was 8.4 percent, unchanged from the revised September 2013 rate.

The United States unemployment rate was 7.3 percent in October 2013. In October 2012, the national rate was 7.9 percent while the state unemployment rate was 7.8 percent.

Across Tennessee, the unemployment rate increased in 64 counties, decreased in 18 counties, and remained the same in 13 counties. There were 13 counties with rates lower than 7.0 percent. In October 2013, the lowest rate was in Williamson County at 5.7 percent, unchanged from the previous month, while the highest rate was in Scott County at 16.1 percent, up from 15.9 in September.

The data from all the nonfarm employment estimates tables include all full- and part-time nonfarm wage and salary employees who worked during or received pay for any part of the pay period that includes the 12th of the month. This is a count of jobs by place of work. Agricultural workers, proprietors, self-employed persons, workers in private households, and unpaid family workers are excluded. These numbers may not add due to rounding. Data are based on the 2012 benchmark.

Total nonfarm employment increased by 400 jobs from September 2013 to October 2013. There were seasonal increases in local government (up 400 jobs), retail trade (up 300 jobs), and transportation/warehousing/utilities (up 200 jobs). This was partially offset by a decline of 200 jobs in leisure/hospitality.

During the past 12 months, nonfarm employment increased by 600 jobs. During the year, goods-producing jobs declined by 300 jobs while service-providing jobs increased by 900.
